Accidents will happen regardless of the speed people are travelling. Bigger issues lie with those who sit too far below the limit. If you lower these areas those people will go even slower. Aggravating others even more than before. Or try widening some roads to have a slow lane eg the expressway!

I disagree with both the bylaw and the current positioning of the speed limit. We live approx 150mtrs from the speed sign and regularly have both cars and trucks speeding past, going both directions, at speeds of much higher than 50km. Trucks are also still using engine braking even though there is a sign clearly asking them not too. I would like to see the sign placed approx 500mtrs back from either the stream or Upham St. This would mean that by the time they reached the housing area they would have slowed down to the appropriate 50km. Alternatively introduce a 70km zone preceding the 50km zone as 200mtrs to slow from 100-50km just doesn't seem to be working. The first four houses all have young children and pets and the high speed traffic is both dangerous and loud. There is also a school crossing next to Upham and often the cars are still either reducing their speed or speeding up in early preparation for the 100km zone. If the police can't sit closer to monitor the speed then at least can speed strips be placed to monitor it? Thank you.

Comments on roads not included in this consultation can be sent to Jagwinder Pannu, Transportation Manager at jagwinderp@hdc.govt.nz</p> <p>Its all good changing these limits – but who will police them? We already have a daily speed problem in our neighbourhood – especially Russell Robertson Dr – even more so with people using this route more whilst Te Mata Rd is still having roadworks – but the police seem too busy to do anything about it. Its a rare sight to see a police presence in Havelock North full stop.</p> | |

Reducing speed limit is not going to make our roads safer. Look at the speed limit overseas in Europe or even in Australia. Slower speed limits is only going to frustrate other motorists and encourage them to perform dangerous overtake. Our cars are same as thus used on atuobarn and are designed to easily drive over 100km and our roads are just as safe, it's the drivers that drive 70 in a 100km roads or 50 in 70km roads and they trying to be heros, which will lead to someone who wants to go the speed limit having to overspeed to pass them.

I work in one of the industrial buildings at Omaha Road end of Chatham Road and feel that a reduction to 50km would be a huge improvement. My office window overlooks Chatham Road and the speed that some drivers drive at is up to 100kms at times. Every time a truck or other vehicle exits from Deakins on to Chatham Road there is a huge risk of collision. Trucks as we all know do not exit quickly and if a car is travelling too fast it will not stop before hitting a truck. The driver (altho) sitting high up cannot see far enough down the road (looking towards Flaxmere) to account for a fast travelling vehicle – especially one that is already driving in excess of the existing speed limit. Please change the speed limit to 50 for the entire length of Chatham Road from Omaha Road end to the roundabout. Speed cameras placed there during the day would also deter speeding drivers.

1. Speed Limit Amendments

Whilst I have not visited any of these sites to ascertain the merits or otherwise of these changes, my view is if it improves safety, driver visibility, better signage location etc; then I would agree with the amendments.

2. Arataki Road Speed Limit.

With 50+ properties now on Arataki Road, this proposal is long overdue. With higher volumes of vehicles, cyclists & pedestrians using the road, safety must be to the forefront of this decision. 50km speed limit is now the most appropriate for this section of road.

If successful, it would be helpful if appropriate communication/monitoring is undertaken to reinforce the "CHANGE".

If you would like to add information to support your submission please do so in the text box below. Comments on roads not included in this consultation can be sent to Jagwinder Pannu, Transportation Manager at jagwinderp@hdc.govt.nz

1. Speed Limit Amendments

Whilst I have not visited any of these sites to ascertain the merits or otherwise of these changes, my view is if it improves safety, driver visibility, better signage location etc; then I would agree with the amendments.

2. Arataki Road Speed Limit.

With 50+ properties now on Arataki Road, this proposal is long overdue. With higher volumes of vehicles, cyclists & pedestrians using the road, safety must be to the forefront of this decision. 50km speed limit is now the most appropriate for this section of road.

If successful, it would be helpful if appropriate communication/monitoring is undertaken to reinforce the "CHANGE".

Its not speed it is the surface that is used try using proper bituman and NOT the stone surface which comes loose and damages vehicles & breaks windscreens.

Farndon road is a key commuter link road, please do not give in to the second attempt to lower the speed on this road. Lowering the speed limit for normal drivers is not required, most accidents on this road have occurred when speeds are in excess of the speed limit ruling at the time. I drive this road twice every work-day, it is rare to travel it's length at 100km/hr. When the limit was 80km/hr it was rare to get above 70km/hr for any of the length, this is completely unnecessary. Also Farnon road has had widening work completed since the limit was restored to 100km/hr.

St George's road is suitable for 100km/hr for it's entire length, please don't increase the 80km/hr section where there are almost no driveways.

Speed limit reductions will NOT stop accidents, just increase driver frustration.

Hi

our address is a new subdivision since 2015. 8 houses were built and its a small non exit street. All families have very young children and the speed limit is 100 km just because it is off Kereru road.

I made some phone calls to the council to complain about it but only answer I received was it takes between 6-8 months to change speed limit for legal reasons.

If you knew it's going to be a new subdivision and a residential area more then 2 years ago then why it is still 100 km speed limit? Will you wait until a child get injured or killed?

Still building sites are there in the area so trucks, contractors and other vehicles are coming-going all day long with high speed. Something has to be done! If some accident will happen I think HDC have to face the consequences

Currently a resident of Arataki Road, HN. I would like to take time and thank the council for looking to reduce the speed limit and have a more proactive approach to reduce potential crashes.

Street lights are being put in and one side is now residential with the other looking like it will be in time.

There is more traffic and pedestrians with lots of families moving in and more traffic/vehicles per household.

From a CPTED point of view it certainly has potential to reduce crashes and prevent further issues. The road is also used by numerous trucks especially towards Arataki Road and travel at speed which also has an effect on the local area through sound and volume.

There are numerous tourist buses visiting the area and again volume is playing a part to the local environment.

There is alot of dog walkers of which some are irresponsible having them of lead and witnessed several running onto roads not under proper control and being a high speed area this has so much potential and there has been several near misses.

I happy to discuss further and thank you for allowing this opportunity to discuss a local issue

Kind regards

Gary

I live rurally and I have been driving for 35 years. The cocktail of speed zones means more braking and drivers unable to comprehend speed limits on the rural roads where speed zones change constantly. It is very frustrating changing from 100 to 70 at waiohiki, 80 to 60 to 80 on Pakowhai and then follow ignorant people on expressway who sit on 75 because they aren't sure what the speed limit is on 100 km roads. Please keep it simple and common sense will be able to prevail.

I feel we are putting a sticking plaster over the real issue, I would question whether the money being spent on this project, would be more wisely invested into bringing driving skills up to a standard that is more in line with the current speed restrictions. Or apprehending unlicensed, drunk or drugged drivers. Whilst I agree mostly with the proposals, I feel rural roads like Farndon road, should be left as they are. As it is worded in the proposal, it is simply not enough to say there have been fatal accidents on this road after it reverted back to a 100km zone, were there fatal accidents when it was an 80km zone? Of those fatal accidents, how many of the drivers were licenced properly? Of those fatal accidents, was speed a contributing factor? Was drink or drugs a contributing factor? It is not enough just to say there have been fatal accidents to justify a change, although this is undoubtedly true, but what are the other facts that have been omitted? Driver education from the root needs to be the focus. There will always be road fatalities, accidents are unavoidable, but educating poorly skilled, unlicensed, drunk or drugged drivers must surely have a greater impact on the road toll than dropping the speed limit by 20km.

i only think that 50km/h is suitable for residential areas, I live in Kirkwood at the new development so you should please consider to move the 50km/h sign to the end of the residential area so that we know our kids are safe in our front yard...

We live past Birdwood Gallery (which is a wonderful gallery)and very popular.

However it would be great to have a reduced speed limit up to the second Endsleigh Rd corner.

We have lived here for 50 years and in that time noticed many changes with More Houses, Many more bicycles, people walking, motor bikes, cars and heavy trucks.

A footpath or cycle track would be an asset to us all.

There have been many near misses on the Middle Rd.Lets not leave improvements too late.

Anne Webb

This proposal will inconvenience local residents and will merely be a revenue gathering exercise. It is at best disingenuous and at worst dishonest to say that lowering the speed limit will reduce the number of accidents and resulting fatalities on these roads. Poor driving, drunken driving, and medical events have caused the majority of fatalities on Farndon Road since we have been in residence since 1992. A lower speed limit would have had no impact whatsoever on these incidents.

Better to increase policing than to reduce speed limits. Too many drivers are getting away with breaking road rules and discourteous behavior because they have little fear of being noticed by police.

I agree with the all the proposals to lower the speed limits due to urbanisation and increased use including cyclists. I would agree to road speed signage being in the most suitable places.

Any change to speed limits in the district will be ineffective unless the policing is done more stringently

If you would like to add information to support your submission please do so in the text box below. Comments on roads not included in this consultation can be sent to Jagwinder Pannu, Transportation Manager at jagwinderp@hdc.govt.nz

The safety of drivers and passengers should be the overriding judgment on lowering the speed limits. While I am sure some will be up in arms and want the status quo, I feel strongly that safety should be uppermost in the Council's considerations and should override any objections. Our district has expanded and the roads are more dangerous now particularly for the elderly, children and animals. As an example, we regularly have irresponsible drivers hooning down Gordon Rd and careering into Pepper St at high speeds, and this is in a high urban area, so I believe any reduction in speed limits can help overall to reduce the risk of accidents in the areas you have outlined. Not sure what to do about the Hoons though!!! Perhaps more patrols in this area?

Thank you

Brookvale Road – between Mushroom Farm and Thompson Road, speed should be 70k/hr
NOT 100k/hr which is ridiculous.

Ocean Beach Road – road signs are also ridiculous!

There are no new houses in York road if that's the reason to lower the speed.

Percival Road – Sportspark – the road leading into the carpark by the childrens play area – the road needs to be 30kmh limit & have speed humps. People drive too fast past the playground area where there are children walking to and from and around vehicles parked along side.

Dear HDC,
 Consideration should be given to changing the location of the existing 50km sign on East Road, Haumoana. The HDC has previously indicated it would do this at the next amendment to the speed limits end undertaken however I do not see it addressed in the proposal. The current location does not allow for the Stage Two development of the deferred residential block on East Road.
 Regards,
 Will

The part of Puketapu Road that I am concerned with is where the cycle and walking track crosses over Puketapu Road and where you enter into the 50kph area going into and through the village at Puketapu. There are numerous pedestrians in that area including children going to the local school.

This is a very dangerous area, the motor vehicles drive down Puketapu Road as if there is time to waste, sometimes well over 100k's

If you would like to add information to support your submission please do so in the text box below. Comments on roads not included in this consultation can be sent to Jagwinder Pannu, Transportation Manager at jagwinderp@hdc.govt.nz

My main concern is with the proposed changes to Farndon road speed limits ,I drive a truck on this road on a daily basis most people don't do 100 km/ hour but if the limit is reduced the police will have a field day just like they did when the limit was dropped out at Craggy Range winery .

There are 5 new houses on this road but no new driveways and when I last looked no houses had been occupied but we have people complaining already

All this handwringing about power poles and trees is getting out of hand ,nothing has changed and the Fatal accident a while back at the Pakowhai road end was by a vehicle that was on speed cut as he went around the corner ,that's how fast he was going and even the 100 limit meant nothing to the driver so I don't think that it should be used as a reason to drop the limit.

I thought we got rid of the traffic engineer who came back from a conference and convinced the council to drop the limits on the 52 km of roads a while back ,he said it was policy but that was a load of tripe it was his own crusade but we are still stuck with the sinking lid on speed limits all around Hastings .

On another subject it has been brought to my attention the council is blocking off River Access at various points due to illegal dumping which has impacted adversely on 4x4 enthusiasts ,instead of blocking these areas why not make the access to hard for cars which is probably all the nappy dumpers and their like have so they can't dump down there .

Red bridge used to be accessible only by 4x4 but I hear it's been made easy to access now with a formed road instead of 600 mm of water to ford and the dumpers have found it ,the expense of roadworks there is a waste of money .

I don't think the Council takes in to account what they are perceived to be doing ie taking away freedoms that we in NZ enjoy that even the neighbours across the Tasman have lost due to the Handwringers for want of a better term . This prescriptive way of assessing roads is at odds with what I've seen in Australia where most roads have a reserve either side and usually redgum tress but they still have 100 and 110 limits but using our council methods Victoria would be a state of 80 km limits .

What is next ?drop the Waimarama road to 80 km all the way ,there are signs at the far end already even tho it's a comfortable 80 km drive the cops would love it if the limit is dropped and remember that every speeding fine is a tax on HB as the money doesn't get spent here and this applies to all the unnecessary speed limit drops .

Thanks

Brian Umbers

I work on Chatham Rd and the legal traffic speed past our driveway is far too fast for the road view when pulling out onto the road. Add to that people that are even breaking the current 70km limit, its only a matter of time before there is a serious crash as there have been quite a few 'near misses'. There have been several minor 'fender benders' over the past few years but luckily only slow moving vehicles were involved.

Limit changes are OTT mostly. With regard to the bylaw amendments forget it – waste of money.

We have lived on the corner of Riverslea Road South and Murdoch Roads for 14 years and can get very dangerous around at this intersection especially when there is sport on at Akina Park. Lots of people and kids crossing the road and young prick speed past here all the time. Need to have something done about it. Speed humps positioned strategically would elevate the problem. Thank you Graham & Tina Bailey

Farndon Road is inherently unsafe at 100km/hr, especially considering the railway incline and bend, and the sharp turn into Pakowhai Road. Any actual driving time disadvantage of lowering the limit to 80km/hr is insignificant compared to the safety advantages

Would appreciate it if the council would consider speed humps between Murdoch Road and Tollemache Road to slow the traffic down. Coming from 100kph to 50kph, majority of the time they are still slowing down to 50 when they hit Murdoch Road, a lot of the traffic passing through appear to think it's still open road and don't brake until they hit Murdoch or start speeding up just after Murdoch when heading south. There are no footpaths and people walk this road, it is not a wide road.

I am surprised there have not been more accidents than there have been. In 6 weeks there have been two accidents on this stretch of Road, one between a motorbike and car, and another where a car hit a car parked on the side of a road at Bareknuckle BBQ, when two cars trying to travel down the road in opposite directions and could not pass due to cars parked right on the road edge on both sides, one plowed into the back of a parked car having moved over for the other one coming in the opposite direction and had to move into the middle of the road to avoid the parked cars. I would ask that the council consider reducing this stretch from 100 down to 70 or 80. 100kmp is too fast for this short stretch of road.

Cars travel well in excess of 100k in Kirkwood Rd it is very dangerous backing out of the driveway as you cannot see what is coming around the bend. Speed bumps would be great as these are already at the Flaxmere Rd end.

Residents in York also find it dangerous especially turning into their driveways.

Kirkwood road 70k is not adhered to as cars travel well over this speed more often than not at times over 100kms. It is dangerous for the residents and visitors. Speed bumps would be great to slow them down also. York road is also dangerous for residents entering and exiting their properties.

I live in Taradale and drive to Hastings for work. All going well this is a 15 minute drive. In that short time frame I encounter50 km/hr, 70 km/hr, 80 km/hr, 60km/hr, 80 km/hr, 100 km/hr and 50 km/hr. More often than not there is a 30 km/hr thrown in for roadworks. How is this safe when I am continually looking at my speedo rather than the road.

Why are you continually introducing new speed restrictions to cater for people who should not be driving because they obviously are not capable of driving at a reasonable speed. If you keep going on in the current manner we will only be requiring vehicles with two gears (slow and reverse).

I am a car driver and a cyclist. I probably never go on some of those roads, but from a cyclist's point of view I want to support any recommendations that make our narrow, windy roads safer.

I travel every day between Napier and Hastings for work and use Farndon Rd daily – for the last six years. . I strongly disagree that the speed should be reduced to 80km/hr. I have never seen any dangerous speeding on that road and users are respectful of the speed limit. Most drivers travel at around 90km/hr and no-one passes because people are aware of the ditches and possibility of vehicles coming out of driveways. If the limit was 80km/hr then some people would drive 70km/hr (this is what happened the last time the limit was reduced to 80km) causing frustration and the only time I ever saw dangerous overtaking. The accidents I know of in Farndon Rd have been due to alcohol and excessive speed (way above 100km/hr) so reducing the limit to 80km would have no effect on the type of person that has no respect for the law. Decreasing the limit would cause longer journey times to and from work and is unnecessary.

It is not just speed that causes accidents. It is in attention, lack of tolerance or being distracted. Reducing speed will not eliminate accidents, it's a very convenient way to suggest it will. Increase driver training, get rid of cell phones and make roads safer by building roads of safer design. By reducing speed limits you are overlooking other positive steps that could be made to keep our roads safe. Pure focus on speed will only give limited results. Since 2011 since safer roads policy came in, our road toll has gone up. It's time to look at the real causes of accidents, not rule by speed (I have 20 plus years as a firefighter)

Middle Road at 100km / h is so dangerous with kids cycling to sweetshop and elderly pulling out of birdwoods. It is incredibly dangerous and the council needs to take responsibility for getting this changed before an accident happens.

PAPER

I think we should decrease the speed limit from 100 to 70km/h. There is high traffic here and many heavy vehicles passes by. There has been many accidents including 1 fatality in last year.

We see people speeding coming from the roundabout. There are many doing illegal overtaking.

There have been 3 crashes on st Georges Rd in the last 18 months. One of those has wiped through my families fence. Thankfully their 3 young children were not playing on the lawn at the time. This road is too fast at 100km/H. Part of it is already 80km/H so it makes sense to slow the rest of the road down, especially where this is a very sharp corner that drivers constantly take too fast. Thanks

PAPER

Chatham Rd – Park is mostly unused, most usage of this stretch is for network commercial & residential transit, should stay at 70kph on efficiency grounds.

Farndon Rd – Recent accidents are due to excessive speeding which signage won't address.

Overall objection to speed limit reductions caused by change of national guidelines whilst underinvesting in road safety measures in the regions.

ie. our taxes go to paying for road improvements in the big metropolitan areas whilst we have to slow down!

PAPER

NB. Comments only.

- 1) Henderson Rd – suggest 50km/h for full length.
- 2) Te Mata Rd – error, should be 250m east of Blackburn.
- 3) Bennett Rd is proposed to have a new school. Reconsider speed & / or length.
- 4) Puketapu Rd is shown as reduced length of 50kph. This is a school area. & should not be reduced.
- 5) York Rd was covered under a Gazette notice for 70kph when it was a state highway. This should still stand. Suggest may need checking

I would prefer slower speeds than 50kph in residential areas to encourage traffic to use main roads and reduce traffic and accidents in residential areas.

PAPER

East Road – Road sign + speed hump located west to end of road
Speeding traffic is already a problem in East Rd. With two tourist attractions, and a new housing development in progress, it will get worse.

Could we please have a 50k limit for all of East Rd., and a 70k buffer zone in Parkhill Road?

PAPER

St Georges Road – Agree totally with proposed speed limit of 100km being reduced to 80km.

Also would be grateful of consideration of the present 80km zone being reduced to 60km – we live opposite Johnny Appleseed entrance – cars/trucks noisy and dangerous – many pedestrians on this part of the St. Georges Road.

PAPER

Let everybody drive to condition.

It is better that kids learn to drive when they are 18. Some people indicate too late. More speed limit sign more ticket/money gathering. But it does not matter what I while you while still carry on with the idea!

The key issue is lack of signage. One never knows whether the limit is 50/70/8/100.

This needs to be addressed.

PAPER

We already have to live with dumbed down speed limits that are rediculas ie Napier Road. We have a more modern automobile fleet on our roads yet all the Council can think up is to slow down traffic. With all the lowered speed limits and lowered alcohol limits we've had an increase in road accidents, perhaps its time we did things differently. ie prosecute slow drivers, try and speed up traffic flow so that drivers are less likely to get frustrated. How about adding extra lanes where possible, maybe undo some of the cycle lanes that have clogged up our roads.

PAPER

We live at 1 Arataki Road & have had 'near misses' several times. Cars coming up Te Mata Rd & put foot down when they come round the corner!

Good idea to have Arataki 50km/h. zone

Cars come round the corner as if it was a racing track!

" 8 Te Aute Rd begin Rural --> Gilpin Rd - 80km

This stretch of Road has always been a disaster!! Lived here 40 years extremely dangerous - speeds up & 150kms deaths

Children cycle to school. Joggers, walkers

School patrol cars still upwards 70ks!!!

Te Aute Rd - Rural --> Gilpin Rd. 80km

Lower Speed to 80ks

Gilpin to bend in Te Aute by Lipscombe Cres. School children, walking, school patrol in Te Aute!!

Why St Georges Rd a not Te AUte???

Te Aute Rd in that stretch deaths. Look up records!!!

PAPER

A win-win situation for all. Fast, traffic will be encouraged to use the Expressway which allows for more speed and keep heavy trucks away from built up areas such as St Georges Rd.

St Georges Rd has a sharp and dangerous intersection at the Sth end, a 45km dangerous corner and heavy traffic has to negotiate the busy Havelock Nth roundabout often pulling out in front of traffic to make their way across.

Truck drivers regard St Georges Rd Sth as a quick unpoliced shortcut to Whakatu and the Port. 80km and more traffic monitoring by police will change this.
