PAPER

1. When alterations are finished at Maraekakaho/HW 50, speed limits may be needed from the old MKK Woolshed to the Chack & Fully. This is a dangerous area between two high speed sections of HW50. NZTA need to be made aware.

2. Maraekakaho village speed limit should be extended past the Bellerby Rd subdivision.

PAPER

I am situated toward the 70kph end of Chatham Road. What would be more effective is a raised judder bar located by the early Childhood Center on Chatham Rd and before the Margate Ave turn.

WRITTEN SUBMISSION/COMMENTS

Please write clearly in ink your comments on the roads noted in this form

I am situated toward the 70kph end of Chatham Road. What would be more effective is a raised judder bar located by the early childhood center on Chatham Rd and before the Margate Ave. turn.

Comments on roads not included in this consultation can be sent to Jagwinder Pannu, Transportation Manager at jagwinderp@hdc.govt.nz

PAPER

Most vehicles entering Te Mata Road off Waimarama Road are travelling at 80kms and on a dangerous intersection affecting traffic turning right into Te Mata Road from Te Mata Mangateretere Road. There is insufficient signage to warn of the upcoming intersection. There is also cycleway crossing from Te Mata Road to River road at this intersection. It is unusual not to hear car horns everyday due to poor warning signage. Thanks.

PAPER

It is too early to reduce speed on Arataki Rd. (where it is 70k at present.) It is wide, still rural on one side, and I have never seen children playing outside the houses or much traffic at any time, and I use it a lot. There is a good footpath for walkers. Very few bikers use the road and it is wide. The biggest trouble is the reduction of roadspeed where there is little need ie also the link road between Brookvale and Napier, and also the wide variety of speed limits. Confusing.

PAPER

Farndon Rd: I can't believe that this road has got a speed limit of 100km/h. It is too narrow, lots of trucks and farm vehicles also use this rd.

It is ironic that Arataki Road residents want a lowered speed limit on their road , when they turn the corner onto Brookvale heading into the village most are travelling at well in excess of the 50k speed limit , many at 80k or more . These are obviously residents of Aratiki Road area as no one else would drive down there when Russell Robertson is shorter and quicker. Brokvale Road is more dangerous now than pre subdivisions when 100k was the limit. I note also that Napier Road with an 80k limit has more cars speeding than when the limit was 100k and is rather more dangerous . Patience goes out the window when many drivers get behind the wheel

We believe the speed limit for Farndon Road should be reduced from 100km/hr to 80km/hr for the following reasons:

There has already been many accidents and some fatalities on this road in which speed has been a contributing factor.

It is a narrow section of road, particularly south of the overhead bridge, with large ditches and power poles. There is very little room for error.

Has three blind corners and narrow overhead bridge with limited visibility.

There are numerous used driveways along the road.

Traffic turning into Greenleaf nursery or Kohupatiki marae can cause traffic to slow down significantly just off the overhead bridge. Note, traffic on the overhead bridge can not see queued cars, thus gives little reaction time if they have to slow down.

Many tractors and other slower agricultural vehicles use this road and often turn. I have experienced a car from behind overtaking two other cars plus myself whilst I had to pull in towards the middle of the road to overtake a tractor.

Cars drive in excess of 100km and do not slow down for the 50km/hr stretch of road at the north end of Farndon road.

Hi Guys

I am a quarry manager based at Websters Lime in Havelock North.

Since the changes to the speed limits in the safer speed zones we have noticed a significant drop in productivity due to limiting truck speeds.

We regularly take or send loads to/from, Napier, Taupo, Gisborne, Auckland etc etc. the routes that have been effected by the safer speed zones already in place.

My concern is that if we reduce the speeds further our turn around times will be greatly affected. An extreme example is Auckland's motorway, transport companies and companies that rely on moving materials have been significantly disrupted through traffic congestion problems greatly increasing the cost of moving materials around the region. While I appreciate we are at opposite poles from Auckland traffic, future consideration must be given.

Manufacturers, orchardists, transport companies rely on the ability to move materials around HB's roads cost effectively if you restrict this the price of materials will increase.

Thanks for your consideration.

Matt

The Function of roads is to move traffic efficiently from one point to another. Clearly more emphasis should be placed on better layout by removing hazards. Remove roadside power pole and fill in or pipe the dangerous ditches. Lower speed limits will not slow drivers in a hurry to get to their destinations. it merely covers the arse of council by placing blame on drivers rather than road designers. It does not fix the bad design nor lead to improved safety. If the costs to fund this expensive "consultation," that is already predetermined, had been applied to road improvements, we would have at least some safer roads...

Please don't delay us further in our travels...

PAPER

Puketapu Road has become very dangerous from the hotel corner to the front where the stop bank cycleway comes out. Cars insert on doing the full 100k although it is a totally unacceptable speed for the area. (50k) would be the most sensible solution.

PAPER

Puketapu Rd. I think should have a 50kph speed limit from the hotel intersection down to the point where the cycleway crosses the road opposite the lake.

There are a lot of school children bikes and traffic in this area and it is very dangerous!! Several near accidents.

I think Vicarage Rd. should be reduced to 50k right thru to where it joins Oamaru Rd at the T intersection, for the same reasons outlined above.

The ones that I have disagreed with are not about the speed limit but educating the drivers. 99% of the population drive at the current speed on those roads without accident but no one seems to consider this! The fault lies with the driver not the speed limit! It's time people faced up to that and provided better driver training. There will still be accidents even with lower speed limits and you will end up with far more frustrated people doing stupid things. Leave the speed limit alone and provide better driver training.

The accident statistics speak for themselves. There are many tractors and agricultural vehicles. Numerous driveways. Deceptive bends and blind corners. Narrow in places. I believe a limit of 80 provides better speed consistency with the Hastings end, and reduces the temptation to speed through the urban zone near Clive pool (this is particularly based on my experience as a nearby resident during the period when Council reduced the limit to 80).

As a frequent user of Te Aute Rd. I cannot understand why it is not 80km/h. If it is to remain at 100km/h I would like to know the rationale behind this.

I would like to see State Highway 2 from Hastings to Clive returned to 100kph as well as Napier Road from Havelock North to Mangateretere returned to 100 Kph.

The only results from the lowering of the speed limit has been divert traffic onto the express way .

If you look at records you will find since the change there has been a large increase in accidents on the expressway .

As a regular user of the express way I note extremely heavy flows of traffic branching off at Pakowhai Road then heading across to Havelock North Via St Georges Road , this traffic used to use existing 100kph roads but with restrictions traffic want to use 100 kph zones.

We noted 3 crashes on the expressway last week alone

your statement "A number of fatal crashes have occurred along this route since it reverted to 100km/h" I think is actually incorrect as I understood the lower speedlimit was in force at the time of the 2 fatals that I recall along this stretch of road.

Shift the speed limit marker to the 210 metre from Black Barn Road. Where it should have been all the time ! This will align better for the down hill grade and for the up hill speed reduction from the 80 kph

As a father of two young boys living right next to this road (Farndon Rd).. I 100% support any measures to make this road safer. Cars often speed through the 50km segment of the road, it is a tragedy waiting to happen. Dropping speed from 100 down to 50km when entering the residential area in reality just doesnt happen. There is a much better chance of this happening if only dropping from 80km. It is also unsafe throughout the whole road and would benefit from the 80km limit throughout- It has power poles and culverts running its length, as well as being very narrow, not to mention the narrow bridge on a corner with a recent heavy vehicle speed limit. Also it seems the road is becoming home to more and more residents/ developments. Without a doubt REDUCE SPEED LIMIT.
Scott.

The Te Mata bylaw amendment needs to have a rewrite, I suspect that the intersection isn't between Te Mata Rd and Te Mata Rd... I disagree with the Te Mata Rd bylaw change outside of the incorrect wording, as the prior 50 kph speed limit location was appropriate, whereas the current location is not appropriate.

We have certainly seen that the reduction in the "safer" speed limits in recent years has not been reflected in a reduction in accidents or fatalities. Some of the accidents would have happened regardless of any signposting. Some accidents are now occurring due to the perception of lowered attentiveness required, which is a byproduct of the reduced speeds. When doing 100 kph, ones full attention is on the road. When doing 70-80 kph, ones attention can wander more easily to the radio, heaven forbid... text messaging, etc. due to the lowered attentiveness required to drive at the reduced speeds. This change in behavior with the change in risk perception has been seen in numerous outcomes which were initially considered to be statistical anomalies. I suggest returning the option of driving to the conditions to the driver, with the assumption that the commensurate penalties continue to apply to drivers that are unsafe or imprudent.

I'll note that many of the past speed reductions in the area which reduced the limits from 100 kph to 80 kph, were unnecessary for safety purposes in my opinion, and the continuation of these reductions are not helpful from a safety standpoint. As an aside, I did an interesting analysis on the amount of additional man-years spent in transit in the "safer" speed zones, and then looked at the fatality rate here. The change added far more man-years of drive time than any man-years gained from lives saved. There is a long-term trend for lower fatalities, this is very likely due to the increased safety designed into more modern vehicles.

I am not concerned that the Farndon Road speed limit is 100 kmph as I believe the road can handle such speeds. However we live in Waitaha Place which is just inside the 50 kmph from Farndon Road. Our small community in Waitaha Place has families which have children who have to cross the road to reach the footpath to go the school, swimming pool, and park with playground access. Many vehicles do not slow down when passing our area to meet up with the Marine Parade road. This means that most vehicles including trucks are not adhering to the 50 kmph speed restriction, and speeds are not being enforced by the authorities. In over 4 years in the area I have never seen any speed cameras being used in this section of road although they are frequently used on the Napier side of the Clive bridge. The short stretch of road has accesses to a public pool, the rowing club, a tennis club and the ruby club, which at times creates significant traffic. Having vehicle travelling through this area at around 100 kmph is dangerous and inconsiderate to the people living in and using the area. Therefore I have decided to push for the change in the speed limit in Farndon Road. I know with this change we are not going to solve the problem but at least vehicles will be travelling through our settlement at around 80 kmph instead of around 100 kmph which will make it slightly safer to all. However some enforce would be more than welcome.

What about No2 Highway going out of Clive to the bridge towards Napier. That turn off into Hohepa is very dangerous as the speed limit is 100 ??????
Ive seen several near accidents there and a proper pileup just last week

I agree that vehicles either in or approaching built up areas need reduced speed limits. I would also like to see on some roads approaching the 50 kph zone traffic islands or other traffic calming measures so drivers see a physical change ahead, or feel it with rubble strips as often vehicles enter the 50kph zone at high speeds not realising there has been a change as often the 50kph sign alone is not effective or easily overlooked.

If you would like to add information to support your submission please do so in the text box below. Comments on roads not included in this consultation can be sent to Jagwinder Pannu, Transportation Manager at jagwinderp@hdc.govt.nz

My particular interest is reducing the speed limit on Farndon Road to 80kph, especially on either side of the overhead railway bridge close to Kohupatiki Road where the speed should be pegged at 60 kph. The local people are familiar with the best practice to execute turning into or out of Kohupatiki Road but the many visitors to the marae find the turn daunting because of the speed of through traffic. Lowering the speed to 80 kph would be a significant improvement and a further reduction to 60 kph in the immediate vaci it's of the bridge would be ideal,

I drive some of these 100km/hr roads daily and feel that a speed limit reduction is not warranted, improvements to the road surface and barriers would be a better solution.

I believe farm machinery posts a substantial hazard and limitations should be placed on time and location of their use of public roads.

PAPER

I was very disappointed that Farndon Rd speed limit was raised back to 100km/hr after the last review. That road is narrow with little shoulder and deep drains either side. Any momentary distraction could be catastrophic.

I'm very saddened to hear that deaths have occurred on that road since.

Safety must come first. 80km/hr is plenty fast enough to get from point A to B. The road toll and injury statistics are far too high. These proposals have been researched by experts. I trust them more than I trust the impatient Hawkes Bay drivers!!

Hi, I also feel the roads in Twyford need to be reviewed. If 2 trucks can not pass each other safely at 100ks per hour it should not be a 100k road. Also there are a lot of 90 degree corners, which should not be part of 100k per hour roads.

Regards
Andrew Flint

York Road: I travel this road 4 times a week. Changes to the present 100km limit are irrelevant as virtually never does traffic allow a speed greater than 60–80km/hr on any part of the road. Passing is not an option because of traffic density in both directions and the short length of the straight.

On any road with only one lane in each direction it is possible to go only the speed of the slowest vehicle – so it is a waste of time and money to procrastinate over speed limits. Educating for poor driver behaviour would be more value/money.

Some drivers unfortunately would not be safe behind the wheel at 10km/hr. I see distraction by cell phones as the greatest cause of accidents.

No matter what the speed limit, safe driving is determined by personal driving skill, traffic density, weather conditions, weight of vehicle load, condition of vehicle, other road users, time of day/night, and whether the driver is under the influence of drugs or alcohol. No matter what the official speed limit, all these factors make a stated limit a joke. Roads have never been better, and modern cars are many times safer than those of old; but unfortunately driver behaviour has not improved over the years. One cannot legislate for idiots.

In regards to York Rd more speed signs need to be in place! Seems people have no idea that this is currently a 100km road until you reach the 70km. People creep along at 50km that have come off the expressway. I've driven this road for many years and it's fine at 100km just needs to be made clear the limit!

I live on Kirkwood Road and for years have watched and heard idiots race at speed down this stretch of road. Neighbours have asked for a speed bump to be put in place...this should be considered as well as reducing speed limit especially with all the NEW housing developments with increased families etc around. Also police need to step up and patrol this area for speed especially at peak times of the day.

WRITTEN SUBMISSION/COMMENTS

Please write clearly in ink your comments on the roads noted in this form

Lowering speed limits in these areas is only likely to cause more accidents to occur due to passing. The Hawkes Bay has little traffic & I find in general the drives to be fairly safe.

Comments on roads not included in this consultation can be sent to Jagwinder Pannu, Transportation Manager at jagwinderp@hdc.govt.nz

Hi,

I am not sure where the 510m would take the limit to but I would guess it is past 1232 Howard Street where it does become more rural. Driving east along Howard street to 1232 Howard street I have been overtaken a few times by cars looking to increase speed to 80km or more before the 80km sign which is dangerous for cars exiting driveways. I understand that a housing subdivision is going in next to Parkvale School as well. I think it would be better to make all of Howard street 50km as it is a relatively short piece that is 80km before the stop sign at St Georges road.

Thanks
Andrew

WRITTEN SUBMISSION/COMMENTS

Please write clearly in ink your comments on the roads noted in this form

I live in The motor camp at 31 Forinden Road.
 Coming to the motor camp from Hastings I am wanting to
 slow down to turn right into the camp but going at 100K with
 usually a car behind me because they tend to be irritated
 at me slowing them down and I fear that they may run
 into me.
 Leaving out of the camp and turning left to go to Hastings

(Comments on roads not included in this consultation can be sent to
 Jagwinder Pannu, Transportation Manager at jagwinderp@hdc.govt.nz

if the engine is cold I like a bit of time for the engine
 to warm up rather than have to accelerate to
 100K straight away.

THE NEW ZEALAND
AUTOMOBILE
ASSOCIATION
INCORPORATED

2 March 2018

Hastings District Council
Private Bag 9002
Hastings 4156

Attn. Gavin O'Connor

33 Carlyle Street
Napier South
Napier, 4110
New Zealand
P.O. Box 225,
Napier, 4140
New Zealand

Ph: 06 834 2590

Dear Gavin,

RE: Proposed Speed Limit Change and the Proposed Speed Bylaw Amendments

Thank you for your letter dated 31 January 2018 seeking the Automobiles Associations response to the above.

The AA District Council supports your proposal in principle and the completed submission document is attached.

We also offer the following comments:

Farndon Road

The proposal to lower the speed limit for safety reasons is supported, however the AA does not consider that lowering the speed limit alone will address safety concerns or necessarily change driver behaviour with regard to speed. The AA strongly recommends that safety improvements are prioritised for this route to increase the safety rating and enable the efficiency of the road to be returned.

Napier Road

The AA Council understands the Napier Road speed limit was not returned to 100km/hr following the review of the blanket rural 80km speed limit. The alignment, clear zone and safety rating for this road is considered to be far superior to Farndon Road and many other local rural roads and we are not aware of any significant crash history or safety concerns on this stretch of road. The AA Council therefore respectfully requests that Council review the speed limit of this road with a view to reinstating the 100kph restriction to return its efficiency for the movement of traffic and freight.

Pakowhai Road

The AA Council recommends that engineering and safety improvements should be programmed for the middle section of this route to allow the speed limit to be increased from 60kph to allow for more efficient movement of traffic and freight to and from the expressway.

Lowering of Speeds

It is our preference that lowering of speeds on roads is not the default position to improve speed related safety. It is our preference is to see investing in engineering and safety improvements first, and should these not succeed then consideration be made to reducing speeds.

Reducing speeds is not the answer to stopping a high percentage of accidents however we do

understand that it might reduce the severity of an accident. We believe that a change in driver's mind-set is required and that further education of motorists on the outcomes of their poor decisions such as red light running, passing before blind corners etc. is essential.

As a result of the high level of motorists killed in 2017 we saw increased advertising to reduce speed but not much around poor decision making.

Red Light Running

It has been brought to our attention that there has been an increase in red light running locally. We ask that the council work with the Police to address this practice. This may include checking the phasing of the lights and subsequent enforcement by the Police. In the Hastings district 4 intersections of concern are:

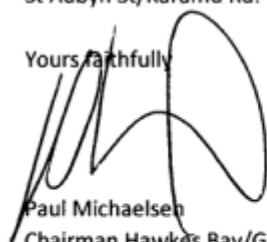

Queen Street to the west of the rail lines

Queen St/Karamu Rd,

St Aubyn St/Market St

St Aubyn St/Karamu Rd.

Yours faithfully

Paul Michaelson

Chairman Hawke's Bay/Gisborne AA District Council

Hi having just read an article in the Napier courier about the dangers of Te Aute Rd at the Longlands Rd intersection I'm wondering why this is not being considered?

I fully support reducing these speed limits , especially on St Georges Road. This road has become increasingly busy with very large, heavy double trailer trucks and is extremely intimidating and dangerous to either walk or cycle on. Traffic travelling at speed has regularly been unable to slow down or stop when residents indicate to pull into their drives. Both cars and trucks use the grass verge to pass traffic sitting waiting to turn right across the road into a driveway.

I was witness to a vehicle with a trailer travelling at high speed and unable to stop, having to drive between a car and the entrance to their property as the car was turning left into the drive, the vehicle and trailer drove in front of the car and down into the ditch and only just missed the car. These are frequent near misses and are all due to fast speeds. Larger speed signs and warnings are needed on St Georges Road South as on St Georges Road North, although I propose that 70km from the roundabout on Havelock Road onto St Georges in both directions – north to Crosses Road and South to Johnny Appleseed Packhouse – would greatly improve the safety and enjoyment for leisure users, cyclists, walkers and residents of St Georges Road.

Lastly, the problem of speeding trucks and cars would be greatly reduced if the police monitored these speed limits. Thank you.

By your own admission the St Georges road section is really OK at 100km/hr and the curve with a 'recommended' speed of 45km/hr is only that – a recommended speed and generally this means it can be safely be traversed at a higher speed.

Just because there has been an accident does not mean that reducing the speed limit will stop this happening again – what were the details on the accident? I would submit that a number of accidents that occur – not just on this section of road – do so because the driver has decided to break whatever speed limit is set! All you are doing is penalizing a significant number of drivers to make it seem like something is being done, when it isn't likely to actually stop the type of drivers that are the issue in the first place. The only thing that may stop them is either better education or more traffic police on the road enforcing realistic speed limits.

If you would like to add information to support your submission please do so in the text box below. Comments on roads not included in this consultation can be sent to Jagwinder Pannu, Transportation Manager at jagwinderp@hdc.govt.nz

I support the reduction in speed at Arataki Road (this once rural outskirts street has now been developed and should be considered residential (ie. 50km/hr). I would add that the section of road from Te Mata Mushrooms to Thompson Road will require widening urgently. I would consider it worth doing a traffic count on this road which carries a high speed limit but does not allow sufficient room for vehicles to flow in opposite directions adequately. I would also suggest an off street iWay limesand path to keep walkers and cyclists off the road, this further triggering pinch points when vehicles approach from opposite ends.

Farndon Road – surely the deaths and serious accidents are reason enough for this speed limit to be reduced. Ditches either side allowing for no run-off, concrete power poles and multiple other hazards within metres of the road margin are not best practice and when something goes wrong, it goes horribly wrong. The Clive Community are behind this request to reduce speed on a road that we could all, with hand to heart, admit is not acceptable to be a 100km/hr road. Having cycled this road once, I pledged I would never put myself under such risk again. There is insufficient road margin to allow for safe cycling. I now travel the extra distance and use the iWay on the stopbank. There is far more likelihood of survival when travelling this section at 80km/hr when something goes wrong, or a vehicle approaches you over the white line. HDC, it would be very unwise to keep this at 100km/hr. Please show as much respect for life and implement action as you would with safety practices brought about after the tractor death on Kirkpatrick Park!

Percival Road has become the hub of activity after hours and over weekends. With construction of the \$25m high performance centre, additional large construction vehicles will be now using this road daily. It would be wise to drop this speed limit to 50km/hr, particularly during construction (stage 1), but with planned additional carparking construction, stage 2 (50m indoor swimming pool), accommodation blocks, and canoe polo ponds planned in the next many years, it is only going to become busier and should remain at 50km/hr I believe.

Thank you for consideration of these serious issues, which I believe should be given full review in light of their health and safety implications.

Your sincerely,

Russ Engelke

Reducing speed limits is not necessarily going to reduce/prevent road crashes as these are usually due to driver inattention or just plain bad driving. Whatever the speed limit, there will always be drivers who feel it doesn't apply to them & will go as fast as they want.

The people already exceeding the current marked speed limits are not going to change just because you alter a number. Take a serious look at the policing and safety levels on all our roads. Have these fancy narrow streets altered the accident rate in town, the ability to see around parked cars is extremely limited, there is no room to move if a child appears or a car door opens, on some intersections you cannot turn without crossing into the lane of incoming traffic and there are still speedsters. Although all these streets are on the edge of a residential area make sure you identify the real hazard, poor culverts/driveway entrances, reduced visibility, pedestrians, cycles, parked cars, damaged surfaces, poor driving, or this will just appear to be revenue gathering.

Dear Gavin

We as residents of Hastings particularly St Georges Road South are pleased the Hastings District Council are addressing the concerns of its residents.

My Husband and I along with our three children have lived at 648 St Georges Road for 7 years. In this time we have seen a dramatic increase in traffic numbers using St Georges Road. The ratio of Trucks to cars has significantly increased as trucking companies are using St Georges Road rather than the Expressway as a quicker more direct option for their vehicles travelling to the Napier Port from south of Hastings. In addition to the extra commercial traffic we have two Fruit Pack houses within two kilometres of our property which have heavy vehicles transiting their yards at all hours of the day.

Our Property is situated in close proximity to the 45km/hour bend at the south end of St Georges Road. We have witnessed several accidents and numerous near misses a stone throw from our gate including four car crashes into our own property. One of these happened last year which my husband Glen Reid emailed you and the HDC about. This accident resulted in a car hitting a tree on our property not more than 10 minutes after our kids had just been swinging from.

We have subsequently fenced over one of the two entrances to our property due to it being right on the bend where it is frankly too dangerous to have as an entranceway. We as parents of young children fear for our children's safety and are very anxious when our kids perform everyday tasks like collecting the mail or shutting the gate.

The current 100km/hour limit in St Georges Road is no longer appropriate for the amount of traffic, the amount of entrance ways and unfortunately many drivers disregard for public safety by not adhering to recommended speed limits ie the 45km bend.

Both my husband and I along with our neighbouring community would fully support a reduction in speed from 100km/hour down to 80km/hour on St Georges Road. We understand there are other areas of concern including the current speed limit in Te Aute and Longlands Roads. We would also fully support any speed reductions that are made on these roads.

Gavin. Once again we appreciate the HDC,s commitment to address this major issue. We look forward to a favourable outcome from the proposed speed limit changes.

With Thanks

Tanya and Glen Reid
648 St Georges Road

As a member of "Village Baptist" every time I exit the property onto Te Aute Road I wonder when someone is going to be in a serious accident in front of the church. Hundreds of people visit the property each week and I know many of them fear driving out into the 100kph zone. Is it not possible to extend the 50k zone down an extra short distance, from what is currently being proposed, or alternatively have an 80k stretch from the current 50k to perhaps Gilpin corner?

PAPER

The existing 50kph speed limit at Whirinaki Rd and North Shore Road is adequate – but not well enforced.

Changing a speed limit to 30kph, and not enforcing it will do little better. The key issue is to enforce the 50k limit. Long term local residents, people, who own property here and other drivers behave. Young men in rowdy cars, tenants and those with no real long term interest tend to drive too fast. Local property owning residents will slow to a walk to pass young children and less able if required – despite the 50k limit.

Too many speed limit changes on little bits of road are confusing to drivers. Leave the speed restrictions as-is and stop mucking around with them. Surely my rates and taxes could be better spent on improving roads and driver aptitude instead of rearranging speed limits.

It is unfortunate but there will always be drivers making bad decisions on the roads. You should be looking at the reasons for the accidents/deaths on these roads, while speed is a factor in the final outcome you are neglecting why the idiots are driving dangerously – the reason for the accidents/deaths.

Also you should be moving the speed limit signage to what was agreed in the bylaws, not changing the bylaws after they have been installed because someone incompetently decided where the signs should be put in the ground.

If you would like to add information to support your submission please do so in the text box below. Comments on roads not included in this consultation can be sent to Jagwinder Pannu, Transportation Manager at jagwinderp@hdc.govt.nz

This submission is on behalf of the Regional Transport Committee, which has limited its comment on speed limit changes to Farndon Road, in light of its strategic significance and concerns about crash rates on this route. The Committee strongly supports the reduction of speed limit to 80km, which is the limit recommended for its Infrastructure Risk Rating.

If you would like to add information to support your submission please do so in the text box below. Comments on roads not included in this consultation can be sent to Jagwinder Pannu, Transportation Manager at jagwinderp@hdc.govt.nz

Lowering the speed limit is not the solution. It just makes for more frustration and risky actions. Traffic should be encouraged to flow, not become an obstacle course.

Lowering the limit will not stop the use of phones or inattention. More education/policing is needed to deal with slow and inconsiderate drivers who obstruct traffic and do not/will not allow others to pass. ie 20ks or so below the traffic flow. If lower limits are made then provision for slow traffic to pull over must also be made.

Re roads like Farndon. The speed limit will not stop the "racers" or txters.

More emphasis should be placed on what caused the accident not just that there was one.

Slowing down the traffic just causes it to bunch up and make leaving a drive way more difficult.

Farndon Road – Is an open country road with good visibility and the recent fatal crashes would have happened regardless of the speed limit. Although any deaths is one too many these accidents were due to excessive speed and inattention and a lower speed limit would have had no effect. The only dangerous section of the road is the railway over bridge, this should be corrected and straightened but people do slow down and drive to the conditions of the road. This is an important commuter road. Having driven the road for the last 18 years every day, my recommendation is to keep the current 100 Km speed limit.

As a resident at the southern end of Riverslea Rd South, I would like to wholeheartedly plead with the council to lower our speed limit from 100 to 70kmh.

The road is used in a huge variety of ways including by tractors, cultivators, diggers, bicycles, forklifts, sprayers, trucks, semi trailers, cars, motorbikes, pedestrians and horseriders.

It is incredibly unsafe for vehicles travelling at 100kph to assume that they can safely share the road with this variety of traffick , particularly when Riverslea Rd Sth is so narrow and has ditches down both sides. There is no verge to pull over onto, no lighting and many residential and commercial driveways.

I have been hit in an accident recently on his road, have had a driver hit from behind when turning into our driveway, had a car and trailer hit outside my property and a car through my boundary fence, all within the two and a half years we have lived here.

All of these accidents were directly related to speed and I believe that the inconvenience caused to the few drivers who might resent a lower speed limit should not outweigh the safety of the majority of the road users. The 100kmh section of the road is only a short distance and becomes 50k with no warning.

It is an outdated speed for a bygone time. The road was not made to cope with the high volumes of fast vehicles.

It's only a matter of time until the next accident.

Yours faithfully,

Leah Macken

I strongly oppose dropping the speed limits on York road and St George's road ,nothing significant has changed on York road and by slowing this down you will restrict traffic coming off the freeway at times,a 30 km reduction will reduce the road capacity by 30 percent .

We are being subjected to the whim of a very small minority and on top of the 52 km of road we were slowed down on a few years ago the place is likely to slow to a crawl if all these changes go ahead .

To slow down St George's road because there is a 45 km bend is daft ,have a look at the Gisborne road some corners are 25 km on a 100 km highway but no talk of slowing that down ,fortunately the council can't .

There is noises from the handwringers at Hohepa homes about the 100 km zone which isn't council road either ,fortunately ,and the rubbish they are spouting about how long it takes them to cross traffick is a load of bollocks ,I drive a concrete truck out of Firth at Awatoto and several times a day have to join the SH2 traffic and rarely take more than a couple of minutes to get a gap suitable for a 26 tonne truck yet the Press are quoting people saying it takes them up to 15 minutes to join the same road and traffic and it's these sorts of whiners who are going to council and getting a hearing .

Another thing to consider when dropping these limits is the extra time it takes a stream of traffic to pass a side road where people are waiting to join .

NEW ZEALAND got rid of the National 80 km limit back in the early 80 s when the road toll was nearly double today's and it seems there is a push to lower it by stealth again as if all the councils do this only state highways will be 100 km zones an unnecessary imposition on people moving around .

This was part 2 of my submission .

Brian Umbers

The latest "policies" of the HDC are a significant backward step in maintaining or enhancing the roading infrastructure of the Hawkes Bay region. The "knee jerk" reaction of wanting to lower speed limits over perceived safety management is a very poor, ineffective and damaging blunt tool used for improving safety. Hawkes Bay is facing increasing traffic volumes over recent years but our roads are getting very little in the way of resources to improve structure, widths, camber, corners and traffic flows. In fact the HDC has gone about making HB urban and rural roads less user friendly, less efficient and less safe with: removing free turning lanes, narrowing lanes, increasing cornering requirements, installing poor road design and generally not taking account of the increasing demands of the HD road network. Rather than taking the "easy" and least expensive option of reducing speed limits the HDC should be making concerted efforts to improve road safety by upgrading the roading network with widening, straightening and modernising the problematic roading network using modern design practices – which are clearly minimally used currently. Decreasing road speeds/limits confers further disruption, time wastage and general frustration to the road users of HB. The HD must stop using the speed limit decrease tool to compensate for a very poor and under resourced roading network strategy.

I have been travelling this section of road for over 15 years twice a day for work during peak time.

I don't believe Farndon Road requires a reduction in speed limit and this was proven previously when Council reduced the limit and then again raised it due to public demand. Farndon Rd is a good road to travel, drivers are courteous and understand the road conditions, orchardists and farmers are aware of their road and are happy to pull over to allow vehicles to pass, likewise vehicles are patient to sit behind these vehicles until it is safe to pass. The road has wide lanes, with excellent flat sealed surface with wide berms on either side.

Perhaps the only unsafe addition to this area has been the allowance to build four houses near the rail overbridge that results in poor visibility of the exit driveways for when these homes will be accommodated. There are long straight sections with excellent visibility that allow safe passing with few visual distractions. Considering the high amount of vehicle activity on this road the accident rate is disproportionately low. Most accident situations are not caused by the road, nor the conditions but driver error, these cannot be eliminated regardless of speed.

As a resident of 6 years whose property backs on to Farndon Road I agree with the proposed speed limit reduction to 80km. A major concern of mine with the current 100km is that vehicles seldom travel 50km in the zoned 50km area as they often speed up early to reach 100km or start to slow only as they enter the 50km zone. I believe a change to 80km an hour will allow vehicles to slow quicker exiting the 80km area and also travel slower entering the 80km area. For the same reasons outlined above, regarding excessive speed, I am also concerned for the safety of the many children who use the pedestrian crossing opposite the Clive clubrooms on a daily basis. There is minimal protection for children from vehicles particularly on the Waitaha place side where there is not even a raised nib to deter vehicles from getting too close to person's entering the crossing. A slower speed limit would assist driver concentration and allow vehicles to slow down much quicker if required in an emergency.

If you would like to add information to support your submission please do so in the text box below. Comments on roads not included in this consultation can be sent to Jagwinder Pannu, Transportation Manager at jagwinderp@hdc.govt.nz

I live in Napier but often work in Hastings, and Farndon Rd is the most direct and convenient route between the two centres. I oppose the reduction of the speed limit to 80km/h.

The community was consulted on this issue recently and the resounding public response was to retain the 100km/h speed limit.

Many commuters use this road before and after work to travel between Hastings and Napier, and vice versa. These users know the road well and are alert to hazards and the overwhelming majority drive sensibly.

When travelling the road at commuting hours, and also during the day, it is very infrequent to encounter any traffic from side roads or properties, so in my opinion this is not a major factor to consider.

The statement of proposal states that a number of fatal crashes have occurred on this road, but does not state the causes. Were the crashes caused by excessive and illegal speeding? Was there drugs or alcohol involved? If so, then reducing the speed to 80km/h will not solve the issue, because these people will still drive recklessly not matter what the speed limit.

For the majority of users of this road that drive responsibly and safely, the 100km/h speed limit is appropriate and safe. Reducing the speed limit would unnecessarily increase driving times. It will inevitably create anxiety in drivers as slower drivers will conservatively drive at 70km/h, further slowing traffic.

In my view Council has not provided enough compelling evidence to suggest that lowering the speed limit is necessary, and I strongly advocate for retaining the status quo. We should set limits for the majority, not the minority of reckless and unsafe drivers.

Regards

Guy Panckhurst

ARATAKI RD: With the significant development in this area, the residential land use, and families residing in the area (and increase in pedestrians and bike riders), the speed limit should be reduced to 50 kph to reflect this.

FARNDON RD: Given the safety record of this stretch of road, I am in support of 80kph.

ST GEORGE'S: I drive this road regularly. Travelling from Havelock Road, the 80kph to 100 kph change occurs just before a tight corner where you need to reduce your speed. This area also has a lot of trucks and tractors, and very rarely would you get up to 100kph for a period of time. I am in support of maintaining the 80kph speed limit along the road; making it safer and also more simpler for drivers along this stretch.

Brownrigg Agriculture farm on Farndon Road – our tractors and trucks are frequent users.
The road is narrow and windy and is not suited to the current speed limit of 100km.

I strongly object to lowering the open road speed limits in our area. Even your own research shows it is not warranted on a safety issue. It was bad enough when the limit was 100 kph and people drove at 80 kph now the limit is 80 kph in a lot of areas and they drive at 60 kph. All the reduction has done is cause a whole lot of frustration and angst among capable drivers. If some idiot is going to drive at 120 kph in a dangerous manner do you think he or she is worried if the speed limit is 100 or 80. Don't continue to impinge on the rights of the ordinary rate paying citizen to go about their lawful business because a few idiots occasionally fall off the road through their own incompetence or stupidity. The last round of safer road limit changes was a crock and so will this one be. As you can see from the answers above I and many of my friends and associates are not opposed to sensible lowering of speeds where urban sprawl has occurred. I hope you listen to reason this time Thanks Greg

WRITTEN SUBMISSION/COMMENTS

Please write clearly in ink your comments on the roads noted in this form

In regards to Farndon rd. This rd was changed to 80 before and never worked. also how many have the accidents on this stretch of rd been drunk. drug. cell phone use related. It seems unfair to lower the Speed for everyone when only a few are having mishaps. Better Signage for Corners and Crash barriers please.

Comments on roads not included in this consultation can be sent to Jagwinder Pannu, Transportation Manager at jagwinderp@hdc.govt.nz

Please indicate whether or not you wish to speak to your submission at a Council Meeting.

☐ Yes ☒ No

(Please tick ☐ the appropriate option)

2. PROPOSED SPEED LIMIT CHANGES

Please indicate whether you agree or disagree with the proposed Speed Limit Change.

(Please tick ☐ the appropriate option - you may tick as few or as many as you wish to submit on).

| Proposal 1-7 | | Agree | Disagree |
|--------------|-------------------------------------|-----------------------|----------------------------------|
| Proposal 1: | Arataki Road (70km/h to 50km/h) | <input type="radio"/> | <input checked="" type="radio"/> |
| Proposal 2: | Chatham Road (70km/h to 50km/h) | <input type="radio"/> | <input checked="" type="radio"/> |
| Proposal 3: | Farndon Road (100km/h to 80km/h) | <input type="radio"/> | <input checked="" type="radio"/> |
| Proposal 4: | Kirkwood Road (70km/h to 50km/h) | <input type="radio"/> | <input checked="" type="radio"/> |
| Proposal 5: | Percival Road (New Road - 50km/h) | <input type="radio"/> | <input checked="" type="radio"/> |
| Proposal 6: | St Georges Road (100km/h to 80km/h) | <input type="radio"/> | <input checked="" type="radio"/> |
| Proposal 7: | York Road (100km/h to 80km/h) | <input type="radio"/> | <input checked="" type="radio"/> |

3. PROPOSED SPEED LIMIT BYLAW AMENDMENTS

The proposed amendments will align the Speed Limit Bylaw with the physical location of road signs. This will not result in any change to the posted speed limits currently in place with regards to the roads listed below.

Please indicate whether you agree or disagree with the proposed Speed Limit Bylaw Amendments.
(Please tick ☐ the appropriate option - you may tick as few or as many as you wish to submit on).

| Proposal 8 | Agree | Disagree |

WRITTEN SUBMISSION/COMMENTS

Please write clearly in ink your comments on the roads noted in this form

| |
|---|
| I am quite happy for the speed limit to be lowered on most of the roads. Another to consider would be the 100km zone on Longlands - Te Aute Rd. |

Subject: Hastings DC Speed Limit change proposals

This email constitutes the NZ Transport Agency's formal response to the speed limit change proposals currently out for consultation by the Hastings District Council. Please note that it replaces the submission from Ken Holst.

The Land Transport Rule: Setting of Speed Limits 2017 details a number of requirements for road controlling authorities in setting speed limits on their network:

- Section 2.2(2): "In carrying out its functions under 2.2(1), a road controlling authority must consider whether a speed limit for a road is safe and appropriate in accordance with this Rule."
- Section 4.2(2) "In reviewing a permanent, holiday, or variable speed limit or considering a new permanent, holiday, or variable speed limit, a road controlling authority must have regard to—
 - (a) the information about speed management developed and maintained by the Agency; and
 - (b) any relevant guidance on speed management provided by the Agency; ..."

The information and guidance provided by the Agency meets its requirements under the following sections of the Rule:

- 2.4(1) "The Agency must supply, to each road controlling authority, information about speed management for public roads within that road controlling authority's jurisdiction."
- 2.4(2) "The Agency must, in supplying information under 2.4(1), prioritise information about public roads where achieving travel speeds that are safe and appropriate is likely to deliver the highest benefits in terms of safety and efficiency."

The guidance provided by the Agency is in the new Speed Management Guide dated November 2016, and the Safer Journeys Risk Assessment Tool (MegaMaps) available to all road controlling authorities. Safe and Appropriate travel Speeds for all roads in the network that the Agency has information available for, together with the top 10% of regional networks likely to deliver the highest benefit in terms of safety and efficiency, are detailed in the MegaMaps.

We have made an assessment of the listing of speed limits proposed by Hastings District Council and note the following:

Proposal 1: Arataki Road:

- We note that this road length is not included in the high benefit opportunities provided by the Agency to the Council
- The current speed limit dataset the Transport Agency has used to develop MegaMaps indicates Arataki Road has a 50km/h speed limit already in place between Brookfield Road and Te Heipora Place

- We note that the Safe And Appropriate travel Speeds (SAAS) for the surrounding network is 40km/h, and it is this information that the Rule requires road controlling authorities to have regard to – as part of early sector partner engagement on these changes as described in the Speed Management Guide and online collateral supplied by the Transport Agency, we would have encouraged Council to consider a broader, area wide speed management approach
- We agree 50km/h is consistent with the current speed limits in place in the area.

Proposal 2: Chatham Road

- We note that this road length is not included in the high benefit opportunities provided by the Agency to the Council
- The MegaMaps indicate a SAAS of 60km/h, and mean actual travel speeds of 50-54 for the length in question. We note the Rule requirement in section 4.4(2)(c) *In setting a permanent... speed limit, a road controlling authority...must aim to achieve a mean operating speed less than 10% above that speed limit.* Noting around 400m of Chatham Road has farm land on one side and Chatham Park on the other, and that “there is little to constrain vehicle speeds”, the Council may find it difficult to meet the requirements of section 4.4(2)(c) of the Rule for a 50km/h length. Council could consider if 60km/h might be more ‘self explaining to road users along the full 500m length (which meets the minimum length for a 60km/h limit in Schedule 1 of the Rule.

Proposal 3: Farndon Road

- We note that this road length is not included in the high benefit opportunities provided by the Agency to the Council. However we also note the information is based on 2010-15 crash data and may not include the more recent fatalities referred to in the report
- We note that the MegaMaps suggests a SAAS of 100km/h for this road length, but that the mean actual travel speed is 75-79km/h
- Our view is that, as central protection isn’t provided, sense testing would confirm the proposed speed limit of 80km/h as safe and appropriate for Farndon Road.

Proposal 4: Kirkwood Road

- We note that this road length is not included in the high benefit opportunities provided by the Agency to the Council. However we note the priority required to reflect changing urban development.
- We note that the current speed limit dataset the Transport Agency has used to develop MegaMaps indicates Kirkwood Road has a 70km/h speed limit from and including Wilkes Place – is Wilkes Place noted in Council’s bylaw as 70km/h, or is it included in Council’s 50km/h urban traffic area?
- We note that the Safe And Appropriate travel Speeds (SAAS) for the surrounding network is 40km/h, and it is this information that the Rule requires road controlling authorities to have regard to – as part of early sector partner engagement on these changes as described in the Speed Management Guide and online collateral supplied by the Transport Agency, we would have encouraged Council to consider a broader, area wide speed management approach
- We agree 50km/h is consistent with the current speed limits in place in the area.

Proposal 5: Percival Road

- We note that the Percival Road connection may be within Council’s defined urban traffic area, in which case the 50km/h default urban speed limit will already apply
- As part of early sector partner engagement on these changes as described in the Speed Management Guide and online collateral supplied by the Transport Agency, we would have encouraged Council to consider a broader, area wide speed management approach
- We note the road length includes road humps, and suggest Council could consider 40km/h might be more self explaining, particularly as part of a broader, area wide speed management approach

Proposal 6: St Georges Road

- As you point out, there is no information in our system for this end of St Georges Road. There could be a number of reasons for this - either the roads are very new, or they were not included in Council’s RAMM system in 2016/17 when the data extracts were taken for MegaMaps, or they were missed off the base CoreLogic centreline database we used for some reason.
- On the information provided in the proposal, the 80km/h speed limit seems sensible.

Proposal 7: York Road

- We note that this road length is not included in the high benefit opportunities provided by the Agency to the Council.

- We note that the existing speed limits for the surrounding network include 100, 70 (including the southern end of York Road), and 50km/h limits, and this proposal will introduce yet another speed limit which may increase confusion for road users – as part of early sector partner engagement on these changes as described in the Speed Management Guide and online collateral supplied by the Transport Agency, we would have encouraged Council to consider a broader, area wide speed management approach
- We agree that a 80km/h speed limit is safe and appropriate for York Road

Proposal 8: Amend bylaw to reflect situation on site at various locations

General comments:

- The approach being proposed is considered outside the requirements of the setting of Speed Limits Rule 2017. The current road length definitions for speed limits in the Council's bylaw are the legal, enforceable extents of speed limits, and the speed limit signs are required to reflect the bylaw details. Council has indicated here that the signs are not in the correct locations on the following list of streets, and it is proposing to change the bylaw to reflect the sign locations, regardless of the assessment requirements of the Rule. The signs may well have been shifted by local residents or maintenance contractors, been put in the wrong place to start with, or Council has consulted previously on incorrect information. Notwithstanding, changes in the legal extents of speed limits as recorded in the Council's bylaw must follow the requirements of the Rule, including assessment considering the information provided by the Agency, consultation with any local communities and any other organisation or road user group that the road controlling authority considers to be affected by the proposed speed limit, or the legality of the changes proposed could be challenged.
- Again, I note that the extent of the speed limits shown in the mapping tool for most of the roads are quite different to what is described in the table of proposals. The Agency derived the existing speed limit maps from the Core Logic centreline data which was informed by Council's RAMM database. The lack of accuracy apparent is quite unusual compared to what we have seen in other local authority areas.
- The Agency's responses below are informed only by Google maps, which are dated between 2010 and 2015 for these areas, and I note there may well have been development on these roads since. The comments provided below are an assessment against the intent of the Speed Management Guide and the requirements of the Setting of Speed Limits Rule, specifically Sections 2.2(2) and 4.2(2), as detailed above.
- The Agency acknowledges the plan received by email from Gavin O'Connor dated 8 March 2018 for the Elwood Road, York Road and Maraekakaho Road 70km/h speed limits, which Section 4.5 of the Rule requires Agency approval. After assessment of the listed locations however, Bennett Road was noted as a reduction in the 80km/h length, which also equates to an extension of the 70km/h length. The four lengths of 70km/h have been assessed and, for the reasons detailed below, the proposed plan is not acceptable. The Agency does not approve the 70km/h speed limits. Without Agency approval, the 70km/h speed limits cannot be legally implemented by the Council. I trust Council will agree with our assessment that the solutions in each case are quite simple, and certainly simpler than the process of gazetting Agency approvals and conditions that the Council would have to monitor.

Specific comments:

- East Road – disagree – the urban nature of East Road changes at the intersection of Rockwood Place – the road is not urban in nature beyond the intersection and at the current location of the speed limit signs – the current bylaw location of the signs is correct, and if advance warning of the speed limit change is required, install advance warning signs
- Te Mata Road – disagree – the nature of Te Mata Road changes at Blackburn Road, and it is not urban residential (50km/h) in nature beyond that. The speed limit change should be at Blackburn Road (note also error in consultation document) – advance warning speed limit signs would be appropriate at the current speed limit sign locations
- School Road (Clive) – disagree – the current location of the 50/70 speed limit sign is not at an obvious change in the nature of School Road to urban residential (50km/h). The obvious change point is at the eastern end of the school (noting that further residential development beyond the school may have happened since the 2013 Google Map)
- Swamp Road – disagree – the bylaw is correct in that no part of Swamp Road is urban residential (50km/h) in nature. The 50km/h speed limit sign should be located at the intersection of Taihape Road. The speed limit on Swamp Road, which has a consistent nature along its length, should be no more than 80km/h
- Waimarama Road – disagree – the urban residential change point is not at the current location of the signs, which should be relocated to the first residential property just before the bridge - if advance warning of the speed limit change is required, install advance warning signs

- Elwood Road – disagree – there is no obvious change in nature of Elwood Road at the current location of the signs, and the legal location of the speed limit change in the bylaw may be more self explaining. Section 4.5 of the Rule requires extensions of 70km/h speed limits to be approved by the Agency. However the simplest solution is to relocate the signs to their legal positions, therefore the Agency does not approve this 70km/h speed limit extension. Without Agency approval, the 70km/h speed limits cannot be legally implemented by the Council.
- Bennett Road – disagree - there is no obvious change in nature of Bennett Road along its whole length, and the current location of the signs seems to have no significance. The proposed reduction in length of the 80km/h road length is in fact an extension of the adjoining 70km/h section, which again requires Agency approval under Section 4.5 of the Rule. However the simplest solution is to relocate the signs, therefore the Agency does not approve this 70km/h speed limit extension. Without Agency approval, the 70km/h speed limits cannot be legally implemented by the Council.
- Maraekakaho Road – disagree – the SAAS for Maraekakaho Road is 80km/h. Council is introducing a new 70km/h speed limit, not extend an existing 70km/h provision. Council needs to simply bylaw speed limits for these road lengths that do not require Agency approval, namely 80km/h to reflect the SAAS, and reflect that speed limit on the signs. The Agency does not approve this 70km/h speed limit. Without Agency approval, the 70km/h speed limits cannot be legally implemented by the Council.
- York Road – disagree – the SAAS for York Road generally is 80km/h. Council is having to introduce a new 70km/h speed limit, not extend an existing 70km/h provision. Council needs to simply bylaw speed limits for these road lengths that do not require Agency approval, namely 80km/h to reflect the SAAS, and reflect that speed limit on the signs. The Agency does not approve this 70km/h speed limit. Without Agency approval, the 70km/h speed limits cannot be legally implemented by the Council.
- North Shore Road – disagree – the western end of York Road is not urban residential (50km/h) in nature (this may have changed as Google Maps for this area is dated 2010), and the maps show SAAS of 60km/h reflecting as it is rural in nature. The SAAS for the residential part of North Shore Road is 40km/h, reflecting the residential access/vulnerable road user nature. Speed limits should be set that reflect these SAAS, not the current 50km/h which creates confusion for road users
- Whirinaki Road – disagree – The function and use of Whirinaki Road is residential access in nature, with vulnerable road users present, reflecting a 40km/h recommended speed limit, as for North Shore Road above.

Finally, we draw Council's attention to the letter it received from the Assoc Minister of Transport dated 13 December 2017 asking all road controlling authorities to consider how they could accelerate the application of the new speed management approach (as detailed in the Speed Management Guide and reinforced by the Setting of Speed Limits Rule 2017). The Transport Agency is keen to work collaboratively with the Council, together with the Police, AA, RTF and your local communities, to accelerate addressing particularly the high benefit speed management opportunities, both local roads and state highways, that the Agency has detailed in MegaMaps.
