1. The front entrance doors to the hall are not weather proof or overly secure with only one latch securing the two doors closed.

We are seeking funds through this application to install an electric hot water zip which will enable users of the hall to wash dishes, make cups of tea with easy access to hot water without having to wait for a hot water cylinder to heat up.

**How will this project contribute to the usage of the hall by your community into the future?**

These works will make the hall more user friendly for our community and others seeking to use it by providing basic/functional kitchen and will ensure it's longevity by replacing the damaged entrance doors with new weather proof ones making the entrance to our hall much more appealing and secure.

**Does this initiative have community support? In particular, does the communities affected by this project support the activities you are proposing?**

Yes  No  Don't know  Not Applicable

Evidence of community support is generally highly regarded as projects with community buy-in tend to be more successful.

**What evidence do you have that this project has community support?**

Attached is a photo taken at our community Christmas function where we celebrated the work we were able to complete after the last round of funding and where we shared our vision for the future of our hall. All those who attended share our excitement and optimism that we will be able to improve the functionality and usability of our hall which we all consider to be the gem of our community.
